

Can you construct a House?

Using the parts in this picture color and construct a home. Don't forget to add windows and a door. Place clouds and the sun in the sky. Add a sidewalk, shrubs and a fence. Warm weather is coming and its time to plant a garden. Mix your compost in the garden and watch things grow. Add a worm to your garden, a bird to your tree and draw a butterfly. Place your Recycling Tubs in a convenient location. Remember to sort your recyclables daily and place in the correct Recycling Bins. Most of all remember, it's all the little things we do each day that make a difference. Help to keep our Earth Greener and Cleaner!!

Did You Know?

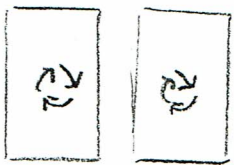

Worms help to increase the amount of air and water that gets into the soil. They break down organic matter, like leaves and grass into things plants can use. Earthworms are good for our Soil.

Birds help control pests like flies and mosquitoes. Some birds, like hummingbirds, help to pollinate our flowers and plants. Large birds like the vulture feed on the remains of dead animals. When birds travel, they take seeds they have eaten with them and disperse them through their droppings.

Butterflies are beautiful to watch. Did you know that butterflies also help pollinate farmers crops and many plants and flowers? The Butterfly is a food source to predators like birds, spiders and lizards.

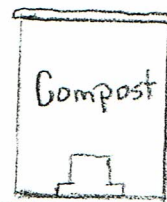

Can You Find These Shapes?

Triangle, Hexagon, Circle, Square, Rectangle and a Oval

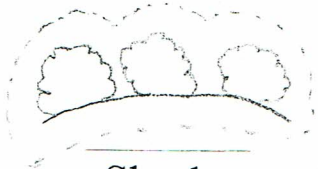

Recycling Bins
